

Carson Patents®

## INVENTION DISCLOSURE FORM

Title or name of the invention

Please provide a written description of your invention. Describe its purpose, parts, construction, how it operates, etc.

What problem does your invention solve? Briefly describe how your invention solves the problem.

List and briefly describe any existing solutions for the problem your invention solves.

Describe the problems, limitations and disadvantages associated with already existing solutions that your invention overcomes.

If there are any known competitors, describe how your invention is different, unique, or an improvement.

Carson Patents®

Which features, items, or capabilities of your invention do you want to protect especially?

Describe possible alternate designs, if any, of the invention (e.g., alternate structural designs, components, materials, process steps, etc.).

Have you already started making, using, and/or selling the invention? If so, when did you start? Are there any new additions, changes, or developments?

In which country/countries will you be making and selling your product/invention in?

Do you want protection in other countries? If yes, which countries?

Has everyone who knows of your invention agreed to keep it a confidential matter?

Do you have any other patents or pending patent applications? If yes, enter the patent numbers or application numbers.

Please also provide any available drawing, sketch or photo of your invention with the major parts visible and described.
